👤 Profile

Software Quality Engineer III with 4+ years of experience across Fintech, B2B SaaS, and enterprise software. Specialized in **Python-based API automation (Pytest + Cucumber BDD)**, microservices testing, and CI/CD integration. Proficient in leveraging **AI tools (Cursor AI, Gemini Gems)** for **BMAD-driven test case generation, debugging, automation scripting, repo-standard adherence, and PR reviews**. Known for reducing execution time, stabilizing flaky automation, and accelerating QA velocity in Agile environments. Experienced in working within **Kubernetes-based setups (WOK workstations, k9s, port forwarding)**, ensuring seamless QA execution in modern cloud-native environments.

🧰 Professional Experience

Jumpcloud India Pvt Ltd,
Quality Engineer II → Quality Engineer III

Dec 2023 – Present | Remote

- Focused on **API automation** using Python (Pytest + Cucumber BDD) in a microservices-based architecture, applying a **shift-left testing approach** with API-first validation followed by UI and integration testing.
- Leveraged **Cursor AI + Gemini Gems** to:
- Generate **BMAD-driven test cases** for complex projects, increasing QA velocity by 40% and accelerating requirement-to-test conversion.
- Debug CI/CD pipeline logs and local runs more efficiently than manual analysis.
- Script API automation and selectively automate critical UI test cases in TypeScript with AI assistance, reducing delivery time.
- Build reusable **AI prompts and skills** for repo-standard test cases and PR reviews, ensuring consistency across automation suites.
- Reduced test execution time by 35% and stabilized flaky tests, improving reliability of automation runs; contributed to early-stage **AI-assisted flaky test healing** initiatives.
- Supported **large-scale testing efforts**, including:
- **Multiple MFE migrations**, selecting critical test cases and combining manual validation with existing UI automation to ensure smooth transitions.
- **Database version upgrades**, validating schema compatibility and ensuring no failures through automation suites.
- Operated within **Kubernetes-based WOK environments**, performing pod checks via k9s and port forwarding to validate services, ensuring QA readiness in cloud-native setups.
- Contributed to **company-wide regression testing**, where each team's end-to-end test cases formed a unified suite, ensuring stability across the platform.
- Followed a **structured QA methodology**: requirements analysis, drafting high-level and detailed test cases, prioritizing P0/P1 scenarios, early automation, and end-to-end testing from the start of development.

- Collaborated across microservices when initiatives required multiple code changes, ensuring correct scope, coverage, and regression stability.
- Integrated automated tests into **CI/CD pipelines via GitHub Actions**, enabling faster release cycles and continuous feedback loops.

Rapipay Fintech Pvt. Ltd., Software Quality Engineer II

Feb 2023 – Dec 2023 | Noida

- Worked on a fintech platform supporting **UPI payments, wallet onboarding, card transactions, and lien management**.
- Conducted **end-to-end testing** for wallet onboarding, activation, and transactions, ensuring seamless financial operations.
- Validated **lien features** to safeguard wallet transactions and fund management.
- Collaborated on **CASA integration** with Jana Small Finance Bank, covering account opening, cheque book issuance, debit card provisioning, and activation.
- Performed **API testing** using Postman, validating request/response payloads and ensuring smooth API interactions.
- Executed **database verification** to ensure transactional accuracy and consistency.
- Built **API test automation** using Java (Rest Assured) with Cucumber BDD, streamlining API testing workflows.

Qapita Fintech India Pvt. Ltd., QA Engineer

Aug 2022 – Jan 2023 | Hyderabad

- Ensured software quality for a **B2B SaaS platform** focused on ESOPs, bonds, and stock options.
- Conducted **UI web application testing**, validating functionality and user experience across the platform.
- Participated in the **complete SDLC**, collaborating with developers and stakeholders in Agile environments.
- Performed **manual regression and smoke testing**, verifying stability after updates and new feature additions.
- Executed **automation scripts** regularly, maintaining consistent coverage and enabling early defect detection.

Chetu India Pvt. Ltd., Software Engineer (QA)

Jun 2021 – Aug 2022 | Noida

- Contributed to cross-domain projects in **Healthcare, E-commerce, and Agriculture**.
- Performed **manual API testing** using Postman, validating HTTP methods, headers, status codes, and payloads.
- Designed and executed **test cases** covering positive, negative, and edge scenarios for API validation.
- Conducted **UI/UX, functional, and cross-platform testing** for web and mobile applications.
- Managed the **defect lifecycle** using in-house bug tracking tools, ensuring precise logging, prioritization, and verification.
- Collaborated with **cross-functional teams** (Business Analysts, Developers, Project Managers) to enhance software quality.

Education

B. Tech - Civil Engineering, GLA University

2013 – 2017 | Mathura

Skills

- **Testing & QA:** Microservices validation, functional/regression/smoke/UI testing, shift-left end-to-end workflows.
- **API Automation:** Python (Requests, Pytest, Cucumber BDD); selective UI automation with Cypress/TypeScript; Java (Rest Assured).
- **Frameworks & Optimization:** BDD-based automation frameworks, flaky test stabilization, execution time reduction.
- **CI/CD & Agile:** GitHub Actions integration, Scrum collaboration, defect lifecycle management, test pyramid alignment.
- **Database & Integrations:** SQL-based data validation, RESTful API and third-party integration testing.
- **Cloud & Tools:** Kubernetes/WOK (pods, k9s, port forwarding), AWS exposure, SaaS IT management solutions.
- **AI-Assisted QA:** Cursor AI, Gemini Gems for BMAD test case generation, requirement analysis, debugging, repo-standard adherence, PR reviews.
- **Domain Expertise:** Fintech (UPI, wallets, CASA, lien), B2B SaaS (device health, remote assist, reporting), Enterprise (ESOPs, bonds, stock options).

Certificates

Rest API Testing (Automation) from Scratch-Rest Assured Java

Udemy

Issued Sep 2023

Credential ID UC-e0dffed3-6f70-
4140-a945-e53c57f1aad8

Highlights

- Promoted to **Quality Engineer III** at JumpCloud within one year, reflecting strong impact and career progression.
- Increased QA velocity by **40%** using AI-driven BMAD test case generation and requirement analysis.
- Reduced test execution time by **35%** and stabilized flaky tests, improving reliability of automation runs.
- Developed reusable **AI prompts and skills** for repo-standard automation and PR reviews, ensuring consistency across teams.
- Contributed to early-stage **AI-assisted flaky test healing** initiatives.
- Supported **large-scale testing efforts** including multiple MFE migrations and DB version upgrades.
- Operated in **Kubernetes WOK environments**, performing pod checks, k9s monitoring, and port forwarding for QA readiness.
- Integrated automated tests into **CI/CD pipelines via GitHub Actions**, enabling faster release cycles and continuous feedback loops.
- Hands-on experience across **Fintech, B2B SaaS, and Enterprise domains**, validating complex workflows and integrations.
